## Women Entrepreneurship in India: Issues & Challenges of Empowerment

✓ Dr. Rahool. Y. Mane

Assistant Professor in Economics,  
D.D.S.S.College, Kolhapur

### Abstract

Women entrepreneurs play a prominent role in Socio-economic development of the country. In fact, the space of economic development of a country can be accelerated by enhancing the status, position and living condition of women in the country. Women have been the economic partner of man in several fields but when it comes to entrepreneurship men seem to dominate the entrepreneurial world. A women entrepreneur has to face many problems such as lack of education lack of confidence family problem lack of management skill, financial problems etc. The time has come when one must start thinking exploring and working towards women entrepreneurship. Women active participation in economic activities leads to their own economic development as well as national development. Entrepreneurial development is not possible without participation of women so there is a need of government, non government, promotional and regulatory agencies to come forward to play the supporting role in promoting the women entrepreneur in India.

The objective of their article is to highlight the problems faced by women entrepreneurs in India & to provide suggestions for women's entrepreneurship development in India.

ATM should be described to the people so that they can easily use the card. 2. Proper infrastructure should be developed in the remote areas so that this facility should be taken to the rural and remote India. 3. People should be made aware so that they can utilize their money effectively through cashless means. Buyers and sellers both should be made aware about the benefits of the cashless transactions. By following some of the points it can be said that we can effectively implement the cashless transactions in the country. It will be better to say that India at this point of time has to go for less cash economy rather than cash less economy. The continuous march towards less cash economy will lead to cashless economy in the country.

## GST – It's effect on Indian Economy

Dr. Rahool. Y. Mane

Assistant Professor in Economics,  
D.D.S.S.College, Kolhapur

#### ABSTRACT:

GST Stands for Goods and Services Tax (GST). The GST Act was passed in the Lok Sabha on 29th March, 2017 and came into effect from 1st July, 2017. It was termed as One Nation One Tax. The major impact of introducing GST in India is the transformation in the fiscal structure of the Indian federal setup. The fiscal right of the states and centre to deal with goods and services independently will be taken away and both the Governments have to depend on each other's for managing the so called goods and services tax in future. This is a very hard blow to the freedom of participating governments in the federal system. The perceived benefits are—

GST would eliminate to a large extent, the multiplicity of administrative mechanisms and tax rates across different states.

It removes many of the cascading effects of indirect taxation.

Its positive impact on retail as a whole will make supply chain more cost effective.

It is expected to address most of the complex issues in taxation like software, intangibles, composite contracts etc. and brings more clarity in the levy.
